SYSTEMS AND METHODS FOR INTERFACING OBJECT IDENTIFIER READERS TO MULTIPLE TYPES OF APPLICATIONS

ABSTRACT OF THE DISCLOSURE

A computing device for processing object identifier data corresponding to an object

identifier is disclosed. The computing device includes a processor and memory in electronic

communication with the processor. Instructions are stored in the memory. The instructions are

executable to implement a method that involves obtaining the object identifier data. The method

also involves obtaining supplemental information about the object identifier. The supplemental

information identifies a symbology of the object identifier. The method also involves matching

the object identifier data with a first pattern associated with a first rule that comprises first

instructions and also with a second rule that comprises second instructions. The method also

involves using the symbology of the object identifier to determine which of the first rule and the

second rule are applied to the object identifier data.
